MATT KILCUP

(602) 410-8882 • Phoenix, AZ • **Matt@MattKilcup.dev**
GitHub - **https://www.github.com/nevermindthelabel**
LinkedIn - **https://www.linkedin.com/in/matt-kilcup-515697168p/**

A full stack web developer with extensive customer relations and interpersonal skills, with a passion to expand upon and nurture my love of writing code.

Technical Skills: HTML, JavaScript, jQuery, Nodejs, Express, CSS, Bootstrap, Responsive Design, React.js, MySQL, MongoDB, Handlebars, MERN Stack, Passport.js

APPLICATIONS BUILT

bAmazon   **https://github.com/nevermindthelabel/bamazon-nodeAndMySql**
- This project was designed for us to create an Amazon style online store
- There are three levels in the project – Customer, Manager, and Supervisor
- Nodejs, MySQL, inquirer, cli-table, and ES-Lint
- As our first back end project, this one was one of my favorites and is visible on a YouTube demo here, where I display functionality, and the code is on GitHub here.

FriendFinder   **https://github.com/nevermindthelabel/FriendFinder**
- This project was designed to simulate the full stack, with data stored in an array
- The data is passed thru from the array to the front end with ajax calls
- jQuery, HTML, CSS, Bootstrap, Nodejs, and Express
- The app is live on Heroku here, and code on GitHub

TrafficMon   **https://github.com/cbessjr/Project-3**
- This project was created to be full stack with React
- Crowdsourcing traffic related information, allows a registered user to create new events
- React, Google Maps, Passport.js, MongoDB, React-Bootstrap, Express, Node
- Link to the project on a live Domain here, and code on GitHub

RELEVANT EXPERIENCE

WebCreationUS - Project Manager   **October 2018 - Present**
- Act as a liaison between customer and developers to assist projects completion in a timely fashion, using the HTML and CSS knowledge acquired while in the boot camp
- Built client relationship based on their needs and utilized front coding skills to help with design enhancements
- Troubleshooting websites live with dozens of customers per week, maintaining a 24-hour turnaround on code updates
- Establish a great relationship with our clients from day one to expedite the development of their projects
- The company experienced the two best revenue months on record during my time there
